

Environmental and Sustainability Policy Statement

Leverton Clarke is a UK based speciality chemicals manufacturer, focussed on the world of LITHIUM. We have more than 30 years' experience manufacturing and supplying a broad range of products to a wide range of technically advanced industries throughout the world. From nuclear to air conditioning, defence to automotive, we work to exacting quality standards to provide speciality chemical products and services.

Leverton Clarke is committed to minimising the impact of its activities on the environment. We are committed to providing a quality service in a manner that ensures a safe and healthy workplace for our employees and minimises our potential impact on the environment. We are committed to the protection of the environment and to fulfill all relevant compliance obligations.

The key points of our strategy to achieve this are:

- Meet or exceed all the environmental legislation that relates to the Company.
- Minimise waste by evaluating operations and ensuring they are as efficient as possible.
- Integrate the consideration of environmental concerns and impacts into all of our decision making and activities.
- Actively promote recycling in order to reduce waste through the re-use and recycling of products and materials where these alternatives are available, economical and suitable.
- Promote environmental awareness among our employees and encourage them to work in an environmentally responsible manner.
- Promote the efficient use of materials and resources throughout our facility including water, electricity, raw materials and other resources, particularly those that are non-renewable.
- Provide appropriate resources to meet the commitments of this policy.
- Strive to continually improve our environmental performance and minimise the social impact and damage of our activities by periodically reviewing our environmental policy in light of our current and planned future activities.
